

1. Saguaros shall be replanted on site in a place where they will be safe from present and future construction activities.
2. A rootball of 24" minimum size shall be retained during transplanting, with root length a minimum of 6" on all sides. Dust all wounds and root cuts with soils sulphur.
3. Saguaros must be transplanted with the same north orientation as they originally grew. "NORTH" to be marked on a rib at a height approximately 5' above grade.
4. Saguaros shall not be transplanted more than 1'-0" below original depth.
5. Saguaros must be watered thoroughly at the time of transplanting to remove air pockets and assure proper soil compaction. Backfill shall be free of injurious rocks and debris.
6. Saguaros over 8' in height must have bracing as per this detail.
7. Saguaros temporarily planted in a nursery must have individually prepared holes; trench planting is not acceptable.
8. A watering maintenance program must be submitted for approval prior to planting being started.
9. Any deviations from the above mentioned procedures must have written approval by a representative of the City of Goodyear.
